

J & B Boat Rental LLC

presents

**J & B BOAT
FABRICATION**

J & B Boat Rental, LLC also owns J & B Fabrications and Shipyard services, specializing in new construction and turn-key delivery of seagoing vessels. The strength of our company lies in the ability to deliver the highest quality vessels at low costs. We are able to provide this service by building not only according to international standards but through developmental research, also to our own developed shipbuilding standard in particular. We offer a substantial range of products to the general maritime vessel building industry.

First, we work alongside with our Naval Architects to design a draft then present the draft to the customer for his approval or make any changes that they require. Once the customer approves the design of the vessel production begins.

From Coast Guard approved to custom pleasure boat building we perform # 1 quality aluminum fabrication and welding. Each vessel is completely built to customers specifications.

Continuing though the following pages, we will show you pictures of our 9600 square foot fabrication shop along with our equipment. You will see the Plasma Cutter table, Tube/Pipe Bender, Press Brake, Shear, Iron Worker , a few of the tools that we use during the process of building vessels. As you continue you will see pictures of a few of the many vessels built by J & B Fabrication, you will see pictures of framing and progress during the building of the vessel, then the finished vessel.

Design

- Meet with Naval Architects
- Final approval on prints

Production

- Construction of vessel
- Report to customer on progress

Satisfaction

- Final walk through vessel
- Present vessel to customer

Few vessels built by J & B Fabrication

We have shown you just a few of the many vessels that were built by J & B Fabrication.

Along with our Marine Architects we can design the vessel of your choice whether it be for business or pleasure and once you approve the design construction begins. There is no job to big or to small for J & B Fabrication.

For a tour of our fabrication shop and answer any questions you may have, all you need to do is give us a call to set up an appointment. We would be happy to show you around and answer all your questions.
